Result # 1 Relevance: 000000

PREVIEW
this document**Report of the IAB Workshop on Internet Information Infrastructure, October 12-14, 1994 (RFC1862)**

13-Sep-2000

IPCOM000004118D

English (United States)

This document is a report on an Internet architecture workshop, initiated by the IAB and held at MCI on October 12-14, 1994. This workshop generally focused on aspects of the information infrastructure on the Internet.

Result # 2 Relevance: 000000

PREVIEW
this document**Referral Whois (RWhois) Protocol V1.5 (RFC2167)**

13-Sep-2000

IPCOM000002724D

English (United States)

This memo describes Version 1.5 of the client/server interaction of RWhois. RWhois provides a distributed system for the discovery, retrieval, and maintenance of directory information. This system is primarily hierarchical by design. It allows for the deterministic routing ...

Result # 3 Relevance: 000000

PREVIEW
this document**Maintenance of duplicate databases (RFC0677)**

13-Sep-2000

IPCOM000003727D

English (United States)

There are a number of motivations for maintaining redundant, duplicate copies of databases in a distributed network environment. Two important motivations are:

Result # 4 Relevance: 000000

PREVIEW
this document**Domain names: Implementation specification (RFC0883)**

13-Sep-2000

IPCOM000003932D

English (United States)

Overview

Result # 5 Relevance: 000000

PREVIEW
this document**Internet Security Glossary (RFC2828)**

13-Sep-2000

IPCOM000003426D

English (United States)

This Glossary (191 pages of definitions and 13 pages of references) provides abbreviations, explanations, and recommendations for use of information system security terminology. The intent is to improve the comprehensibility of writing that deals with Internet security, ...

Result # 6 Relevance: 000000

**DASS - Distributed Authentication Security Service (RFC1507)**

12-Sep-2000

IPCOM000002336D

English (United States)

1.1 What is DASS?

Result # 7 Relevance: ○○○○○

**Routing Policy System Replication (RFC2769)**

13-Sep-2000

IPCOM000003367D

English (United States)

The RIPE database specifications and RPSL define languages used as the basis for representing information in a routing policy system. A repository for routing policy system information is known as a routing registry. A routing registry provides a means of exchanging ...

this document**Security Label Framework for the Internet (RFC1457)**

12-Sep-2000

IPCOM000002285D

English (United States)

This memo presents a security labeling framework for the Internet. The framework is intended to help protocol designers determine what, if any, security

labeling should be supported by their protocols. The framework should also help network architects determine whether or ...

A One-Time Password System (RFC1938)

13-Sep-2000

IPCOM000004243D

English (United States)

This document describes a one-time password authentication system (OTP). The system provides authentication for system access (login) and other applications requiring authentication that is secure against passive attacks based on replaying captured reusable passwords. OTP ...
